

“ HELP! ”

Our project started to operate under the coordination of **FRANCE** with the **GREEK** partnership with the project number 2021-1-FR01-KA210-SCH-000031354.

“Help!” The project was implemented to increase the awareness of students, parents and society about water. With this project, our students will learn about the unnecessary use of water, the importance of water for people, and the different uses of water in the fields of health, sports, energy, production and art. The historical importance of water for societies will be mentioned. Thus, we will carry out activities to raise a more conscious society.

Briefly, our project will try to achieve the following specific goals:

- 1. To show students the cultural, scientific, artistic, sports and health aspects of water,**
- 2. To adopt the importance of water for humanity,**
- 3. To raise awareness about water scarcity,**
- 4. To scan cultural awareness about water culture and cult in societies,**
- 5. Developing students' creativity and social skills,**
- 6. Developing students' language skills,**
- 7. Establishing a network of water-friendly schools and expanding this network with the help of local authorities.**
